

**What powerful
greenhouse
gas is
produced
when organic
matter like
food scraps
and garden
cuttings are
thrown into
landfill?**

Methane, a greenhouse gas with 20 times the global warming capacity of carbon dioxide (CO₂), is produced when organic matter breaks down in landfill.

What can you do?

Reduce the amount of food you waste and use a compost heap, worm farm or bokashi bucket.

Check green waste collections in your council area on RecyclingNearYou.com.au
