

# Do aerosol cans go in your kerbside recycling bin?

**Yes, all steel products are recyclable.**

**Just dispose of the plastic lid and nozzle, and place the can in your recycling bin.**

**Did you know...?**

**Making steel from recycled cans uses 75% less energy than when producing steel from raw materials.**

**17.5 million steel cans are recycled each week in Australia – aerosols, food tins and paint tins. This is equivalent to the amount of steel needed to build 900 family sedans!**
