

# Recycle Right....

# batteries

Batteries can contain hazardous materials including cadmium, lithium, mercury and zinc. When batteries are recycled, plastics and metals are recovered which can be used to make new batteries.

There are a number of collection programs that accept various types of batteries for recycling.

For more information about battery recycling visit [RecyclingWeek.PlanetArk.org](http://RecyclingWeek.PlanetArk.org) or call the Recycling Hotline 1300 733 712.
